Footwear Construction

Outsole: Composed of two layers of polyurethane (PU), injected directly onto the upper. The 1st layer (midsole) is softer and lighter, with a density of 0.4 g/cm³, providing greater comfort; the 2nd layer (outsole) is more compact, with a density of 1.0 g/cm³, abrasion-resistant, featuring an anti-slip design with special grooves 3 mm high and 6 mm wide, ensuring slip resistance on ceramic and steel floors (SRC Level).

Upper: Water-repellent full-grain leather with thickness from 15 to 17 lines.

Color: Black

Sizes: PU Bidensity 33 to 47

Collar and Tongue Lining: Non-woven short-fiber fabric with a minimum thickness of 1.9 mm.

Toe Cap: Ultra-resistant polymer plastic, capable of withstanding impacts of 200 J and compression of up to 1500 kg (N). Lighter than steel toe caps, it also features antimagnetic and anticorrosive properties and is non-detectable by metal detectors.

Assembly Insole: Non-metallic puncture-resistant insole up to 1100 N, made of multiple layers of 100% polyester fibers. Protects 100% of the plantar surface of the foot.

Hygienic Insole: Anatomical, molded in antifungal/antibacterial EVA, composed of micropoints that provide sweat absorption and desorption.

Technical Information

Requirements: NBR ISO 20345:2015
NBR 16603/2017

Service Life: 60 months – The service life of the equipment begins from the manufacturing date stamped on the footwear.

Weight per Foot: 0.642 kg.

Shaft Height: 160 mm
(Note: Shaft height is based on size 40 and may vary by 3.33 mm per size).

Packaging

Plastic bag inside master cartons.

- **Dimensions:** L 565 mm x W 300 mm x H 245 mm (Master carton for up to 5 pairs)
- **Dimensions:** L 414 mm x W 315 mm x H 505 mm (Master carton for up to 10 pairs)
