Construção do Calçados

Sole: Bicomponent made up of a layer of polyurethane (PU) and another layer of rubber, injected directly into the upper, with the 1st layer (midsole) being softer and lighter, with a density of 0.4g/cm³ providing greater comfort; and the 2nd layer (sole) being more compact with a density of 1.05g/cm³, resistant to abrasion, with an anti-slip system made up of special grooves 3mm high and 6mm wide. Slip resistance on ceramic and steel floors (SRC) and contact heat resistance of 300°C for up to one minute (HRO).

Upper: Made of black water-repellent leather with a thickness of 15 to 17 threads.

Back: Thermoplastic 1.5mm

Upper and sweat lining: Short fiber non-woven fabric with a minimum thickness of 1.9mm

Toe cap: Ultra-resistant polymer plastic, withstanding impacts of 200J and compression of 1500KG (N), lighter by around 51% compared to steel toe caps. It also has anti-magnetic and anti-corrosive properties and is not detectable by metal detectors.

Mounting insole: Non-metallic mounting insole, made of multiple layers of 100% polyester fibers. Puncture resistant up to 1100N. Protects 100% of the foot's plantar surface.

Hygienic insole: made of anatomically shaped EVA with micro-dots that absorb and desorb sweat.

Color: Black

Simple numbering: 33 a 47

Technical Information

Approval NBR ISO 20345:2015
NBR 16603/2017.

Shelf life 36 months - The equipment's shelf life begins with the date of manufacture engraved on the shoe.

Weight per foot 0.625 Kg

Barrel height 160 mm

(Note: The height of the shaft is based on shoe number 40, and may vary by 3.33mm per shoe number).

Packaging:

- Sizes: L 565mm x W 300mm x H 245mm (Collective box for up to 5 pairs)

- Sizes: L 414mm x W 315mm x H 505mm (Collective box for up to 10 pairs)
