Footwear Construction

Sole composed of two layers of polyurethane (PU), directly injected into the upper. The first layer (midsole) is softer and lighter, with a density of 0.4 g/cm³, providing greater comfort; and the second layer (outsole) is more compact, with a density of 1.0 g/cm³, resistant to sharp, piercing objects and abrasion, featuring an anti-slip system with special grooves measuring 3 mm in height and 6 mm in width, and slip resistance on ceramic and steel floors (SRC level).

Upper: Nubuck leather with thickness from 15 to 17 lines.

Color: Graphite.

Sizing: Dual-density PU, sizes 33 to 47.

Vamp, tongue, and shaft lining: Intelligent system for rapid moisture dispersion and temperature regulation, coated with PCM Outlast Climatech microcapsules.

Toe cap: Ultra-resistant polymer plastic, withstands impacts of 200 J and compression up to 1500 kg (N), approximately 51 % lighter than steel toe caps. It also has anti-magnetic and anti-corrosive properties and is non-detectable by metal detectors.

Insole: Soft Bed PU hygienic insole made of EVA with antifungal/antibacterial properties, composed of micropoints that provide absorption and dissipation of sweat.

Puncture-resistant midsole: Non-metallic, resistant up to 1100 N, made of multiple layers of 100 % polyester fibers. Protects the entire plantar surface of the foot.

Counter: Thermoplastic 1.5 mm.

Technical Specifications

Requirement: NBR ISO 20347:2015

Validity in use: 36 months

Note: The validity of the equipment starts from the manufacturing date engraved on the footwear.

Weight per shoe: 0.525 kg

Shaft height: 128 mm

Note: The shaft height is based on size 40 footwear and may vary by 3.33 mm per size.

Packaging

Dimensions: L 34 mm x W 28 mm x H 13 mm (Individual box)

Dimensions: L 345 mm x W 593 mm x H 536 mm (Collective box for up to 14 pairs)
