Footwear Construction

Sole: Made of two layers of polyurethane (PU) with a protective layer (CP), directly injected onto the upper. The first layer (midsole) is softer and lighter, with a density of 0.4 g/cm³, providing greater comfort. The second layer (outsole) is more compact, with a density of 1.0 g/cm³, abrasion-resistant, featuring an anti-slip system with special grooves 3 mm high and 6 mm wide, ensuring slip resistance on ceramic and steel floors (SRC level).

Upper made of **paraffin-treated leather** in coffee color, with a thickness of 18 to 20 lines.

Color: Coffee

Sizes: Dual-Density PU 33 to 47

Vamp Lining, Tongue, and Shaft Lining: Intelligent system for rapid moisture dispersion and temperature regulation, with PCM Outlast Climatech microcapsule coating.

Toe Cap: Injected polypropylene plastic, with a thickness of 1.5 mm. **Note:** this type of toe cap does not have the same safety characteristics as a steel toe cap.

Insole Board (Mounting Insole): Sewn to the upper using the Strobel system, made of needle-punched and resin-coated polyester, with a thickness of 2.0 mm.

Comfort Insole (Hygienic Insole): Soft Bed PU Jacar, providing perfect adaptation to the feet and greater comfort, preventing muscle fatigue. Its surface with micropores offers better sweat absorption and desorption.

Technical Information

Requirement: NBR ISO 20347:2015

Validity: 36 months – The validity of the equipment begins from the manufacturing date stamped on the footwear.

Weight per shoe: 0.525 kg

Shaft height: 128 mm

(Note: Shaft height is based on size 40 shoe, and may vary by 3.33 mm per size.)

Packaging

- **Dimensions:** L 34 mm x W 28 mm x H 13 mm (Individual box)
- **Dimensions:** L 345 mm x W 595 mm x H 536 mm (Collective box for up to 4 pairs)
